GOOD TO PERSON

- Control + Measuring + Analytics: Retrofeed for performing. Energy and efficiency data analytic, are the key fact to drive your maintenance from preventive to predictive. That's the industry 4.0 age.
- Modernization: The New E-Consumer habbit's, have been changing the market place rules. Those new trends drive us to new rules for our customers and we have being performed our services and capabilities to empower and optimizing systems according these new ones. Keep upgrading our customers system's to keep it the innovation way through the forth industrial revolution. INDUSTRY4.0
In that new industrial age, machines and humans Work together sharing information and keep on performing them selves all the time. Pointing to high efficiency plants CDs, warehouses and Fulfillment Centers.
-Official Service & Spare Parts:
Emergency kits always available, and customer supports 24x7. Always-On.
Interroll Official Service for Argentina

PARTNERS

The Interroll Group is a leading global manufacturer of key products and high-quality service provision for internal logistics with HQ in Switzerland. We are the exclusive Partner in Argentina of its #RollingOnInterroll Program, thus ensuring the level of quality globally, with local service and assistance for our clients.

It reaches beyond the limits of traditional transport systems thanks to the revolutionary development of smart modular belts. A step ahead of industry standards. Exclusive licenses ARB (Activated roller Belt) and DARB (Dual Activated Roller Belt) in Argentina.

Cassoli is an Italian company with more than 75 years of presence in the market of Movement and Storage of Products and Loads. Today with a global presence, Cassoli with HQ in Italy has production plants in the US, Poland and Brazil. We have local exclusivity to provide our customers with the best automation options tailored to their needs: AS / RS Miniloads, AGVs, SLS, Radio Shuttles. Full range of open Information Systems for the management of warehouses and warehouses, are some of the customizable products and complements of the intralogistics solutions development.

With more than 40 years of history, Haloila is the leading company in the manufacture of automatic and semi-automatic wrappers with the highest quality. Narrow, stretch wrap machines for all types of loads. It is part of Signode Industrial Group, which is composed of more than 90 business units specialized in packaging machines and materials throughout the world.

Smart Pal Line of Palletizing Robots among other advanced technological solutions that lead us to the future of Production and Digital Processes. Comau products combine modern technological expertise and innovative engineering, ensuring long-term performance, accuracy and reliability. Comau generates intuitive solutions, easy to understand and operate, keeping automation simple, while quality is increased and processes are optimized.

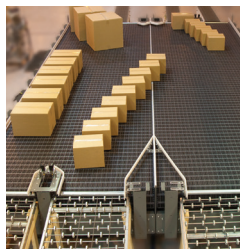

Conveyor systems for efficient production process flow and assembly lines

Quintino Material Handling Solutions design and develop and manufacture conveyor equipment for all types of industries, every day of the year, for more than 25 years, and we are proud to have a huge know-how in innovation and quality.

Our conveyor and intralogistic systems are developing focused in specific parameters established in conjunction with our customers, based on their specific operational needs, forming a team and establishing long-term professional relationships.

- Turnkey handling and conveying systems
- Modernization of existing systems
- Process line refunctionalization due to process changes
- Addition and Extension of lines
- Total or partial automation
- Technological upgrades

Our flow process systems designed, manufactured and implemented by our engineer team and production plant, are suitable for all kinds of industries: Food, Non Food, Pharma, Fridges, Fresh Products, Retail, E-Commerce among others, as well as products in their different process stages.

We put all our experience and know how to keep the whole line works in harmonic flows and easily setting into a friendly environment. As a key fact, we put all our intelligence to integrating these systems with the current and future computer environment of the plant, planning the scalability of the system from the beginning and working with our customers and accompanying them in this emerging environment: The fourth industrial revolution, # Industria4.0

- Solutions to specific handling requirements:
